Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Claims 1-17, drawn to a peptide derived from an antibiotic peptide that does not have a disulfide bond, a compound comprising the antibiotic peptide and the use of the peptide, classified in class 530, subclasses 326, 327 and 328, for example.

Applicant is required to select one (1) peptide sequence by SEQ ID NO: in claims 7 and 8. Each of the peptide sequences, absent factual data to the contrary, represents a distinct peptide.

The claims are directed to different inventions which are not linked to form a single general concept. The peptides in the claims do not have in common the same or corresponding structural and technical features. In particular, each peptide is directed to distinct chemical entities; and methods, which use different materials and produce differing effects. For example, the specification (pages 22-23) has shown the internalization ability of various peptides on different cell lines and has demonstrated each peptide has differing effect toward various cells (Tables III and IV), e.g., SM2196 (SEQ ID NO: 25) has better internalization in tumor cells (HepG2, A172 and HT 29) than in non-tumor cells (MRC5 and HuVeC, while SM1738 (SEQ ID NO: 15) has greater penetration in non-tumoral cell lines than in tumoral cell lines. Accordingly,

Art Unit: 1653

the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept and lack of unity is deemed proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Duane Blake on July 1, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (703) 308-9437. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
